

## HIGH PERFORMANCE AND TOUGH, BUT THIN. SOCKETS NO 50/52.

For users that want more. STAHLWILLE sockets, manufactured from very tough steel alloys, are produced to extremely tight tolerances. This enables STAHLWILLE to achieve the legendary thin-wall construction that is an advantageous and often a decisive factor in confined working spaces. At the same time, the AS Drive (anti-slip drive) ensures excellent force transmission to the fasteners without rounding off the corners.

### Size 36 sockets

- Made of HPQ® high-grade steel, extremely resilient to loads
- The special AS Drive enables high force transmission and prevents the corners of the fasteners being stripped
- Free of cadmium and are therefore suitable for use on titanium alloy parts and titanium fasteners.
- Durable premium quality - »Made in Germany«.
